

ARMORED LIQUID LEVEL GAUGES

FROST PROOF GAUGES

Available on: Reflex Models
Transparent Models
Large Chamber Reflex and Transparent Models

Frost Proof Gauges are used extensively in the chemical, petroleum and other processing industries where low temperatures are involved. The plastic extension projects beyond the cover so that the frost cannot build up or accumulate in the visibility slot and obscure reading of the liquid level. The extension can be furnished 2" thru 6" above the cover as required.

Temperature range between -20°F to -150°F - Bar Stock Chamber -Stainless Steel
Covers-3 1/2% Nickel Steel, ASTM spec
Bolts & Nuts - Stainless Steel

Temperature range -150°F to -325°F - All metal parts - Stainless Steel
